GRUPPONUEVA THANKS YOU FOR YOUR TRUST IN US.

GruppoNueva launched its first Sintered Stone in 2018 in a Gloss Finish. Strong and constant R+D efforts led it to presenting Four additional finishes in 2020 and One in 2024 - Italian, Feel, Sparkle, High Gloss & Anti.Skid - with which it has enriched the variety of products, in line with the market trends and needs.

The differences between the finishes can be seen in the textures and reflections on the surface. The Gloss Finish is completely Gloss whereas the Italian finish is silkier to touch and features a faint shine. The Feel finish features a scratch-proof surface with very little shine and is more smooth to touch. The Sparkle finish is the Sparkling added in the Selected Figures of Marbles on top of the Feel Surface. Finally, the High Gloss finish stands out because of its high degree of shine and perfectly linear reflection which accurately replicates the finish expected of the most exquisite natural stones and exclusive marble to provide depth, realism and sophistication to the designs for which it is used. Anti.skid is the latest Technology developed by GruppoNueva which is perfect for the outdoor applications.

With all of the finishes, we offer our customers (who are our most valuable asset) a high quality product manufactured under environmentally friendly conditions and using manufacturing techniques that foster the reliability and prestige of counter tops made with GruppoNueva. And we make out personalised service channel available to them through email so they may tell us of their needs and suggestions to help us with our commitment to ongoing improvement.

The security offered by our quality management and excellent production processes allows us to guarantee the quality of the GruppoNueva surfaces.

MULTIPLE SURFACE FINISHES

The Surface finish of a tile is the feeling that rounds off the idea, hence its special relevance. Depending on it, we can choose contrast or material continuity, adapting formats and finishes to the needs.
